We're about:

Open Source · Software Development · Cloud Computing · Microservices · DevOps

In the cloud era, the application platform will be delivered as a service, often described as Platform as a Service (PaaS). PaaS makes it much easier to deploy, run and scale applications. Cloud Foundry is the industry's Open PaaS and provides a choice of clouds, frameworks and application services. As an open source project, there is a broad community both contributing and supporting Cloud Foundry. This Meetup is dedicated to fostering community engagement, contribution support for Cloud Foundry in Colorado. Follow this Meetup on Twitter: [@cocloudfoundry](#)
